

# Request for Change (RFC)

## Introduction and Instructions

OSCRE invites anyone wishing to suggest an official change to an OS CRE publicly-available standard or document to use this form to submit single or multiple Requests for Change. All submissions are subject to OS CRE's Intellectual Property Policy. Please also review the full Request For Change Procedure.

Complete all areas of the form to the fullest extent possible. If you have questions or need help finding or interpreting information that is available from OS CRE.org please contact [ChangeRequests@OSCRE.org](mailto:ChangeRequests@OSCRE.org).

## Mandatory Information

**Submitter must provide the following information in order for the Change Request to be considered**

<b>* Name:</b>	Andrew Marlow
<b>*Organization you are representing in making this request.</b>	Visible Performance Systems Ltd.
<b>*Your E-mail Address:</b>	<a href="mailto:ajm@vpsys.com">ajm@vpsys.com</a>
<b>*Contact Phone Number:</b>	+44 (1525) 221633
<b>*Change Description:</b> Describe the Change/s are needed here.  Where possible, be specific to xsd documents,( include the namespace) and elements within those documents.	<p>In the new PMR schema for member review the PartyType component contains a PartyType component which creates an infinite loop.</p> <p>This issue was discovered previously in the Lease Summary Delivery Project, and the PartyType subcomponent was removed as it was considered to be redundant.</p> <p>There are several schemas which were derived from the Lease schema, or had the Lease schema embedded, such as PIE and PMR. As the originating Lease schema does not require this PartyType subcomponent, the simples solution is to remove the subcomponent from all such schemas.</p>
<b>*Why is Change Needed?</b>	<p>This PartyType subcomponent of PartyType creates a circular reference – an infinite loop in effect, which is not just wrong, but will break many Xml tools which read the schema.</p>

# Request for Change (RFC)

## Supplementary Information

<b>Additional Requesters:</b> Names and Company Affiliations of others who join in this RFC.	Richard Dace, Trace Solutions Ltd.
<b>RFC Source/s:</b> Such as: Workgroups or Members with responsibility for the Standard, Non-member organization or activity group.	Work carried out by Andrew Marlow for the Lsdp project.
<b>Dependencies:</b> Are other Workgroups, or other adoption or implementation activities dependent on the requested changes?.	Yes as noted above.
<b>OSCRE Documents Affected:</b> List specific OSCRE Standards affected by this RFC.	All Lease schemas PIE PMR Any other schema using ParyType with a ParyType sub-component.
<b>Program or Activities Affected:</b>	
<b>Other Documents:</b> Name any additional documents which relate to this/these RFC including references and/or URLs where the documents can be sourced. For multiple documents zip together and email, along with this RFC document to 'changerequest@oscre.org'	
<b>Other Notes or Comments:</b>

## OSCRE Staff and Working Group Use

<b>*Record of Status:</b>	<b>Status:</b>	<b>*Date</b>	<b>Notes</b>
	<i>Received</i>		
	<i>Staff Review</i>		
	<i>Accepted</i>		
	<i>Accepted with Changes</i>		
	<i>Deferred</i>		
	<i>Rejected</i>		
	<i>Forwarded to Workgroup</i>		
	<i>Complete</i>		
	<i>Closed</i>		
<b>Additional Notes:</b>	<b>Date</b>	<b>Note</b>	
<b>Critical Events:</b> Describe critical events, dates, and dependencies.			
<b>Consequences:</b> If RFCs are not incorporated. <b>* Required if Criticality is High</b>	Errors in Xml tools which cannot handle an infinite loop.		
<b>* Assigned/Referred To:</b> Provide name of OSCRE staff, member staff, name of one or more Workgroup, name of other OSCRE group, or name of other non-OSCRE group.
