The OSCRE Academy’s on location Data Governance Learning Lab takes a face-to-face approach that covering these areas of data governance:

- Build an information-enabled business
- Link information management and sourcing strategies
- Information architecture, data integration and business intelligence
- Information standards strategy
- Data quality and data governance
- Implementation and change leadership
- Real estate use cases and case studies
- Work on a real data governance project

The small group interaction helps you get practical answers to critical questions, share experiences, and learn from your peers facing the same challenges you are. Learn how to build the framework for an effective real estate data governance program and grow your organization’s data governance maturity capabilities. This is a highly interactive learning environment. Come away with a strong skill set to build a plan of action.

Top 5 reasons your organization needs a data governance strategy:

1. Improve data integration with external business partners
2. IT and the business communicate and collaborate better
3. Develop agility to set priorities for data faster and allocate resources
4. Build a foundation for better business intelligence and analytics
5. Strengthen your team’s capabilities and set the right direction

Build your skills to harness the power of data with OSCRE’s on location Learning Lab.

Learn more by viewing the program FAQ.

“It’s easy to find expertise and training classes on data governance for other industries, but the lack of CRE knowledge makes the experiences less relevant. I like this program because this is the first and only one we know of that addresses data governance in the real estate industry.”
